

## ASD-5 Smoke Alarm

### Brief user protocol

1. This detector has 2 interchangeable AAA batteries.  
Only attach the smoke detector with the supplied adhesive strip or mounting material
2. **Activate:**  
If you insert the 2 batteries correctly, you will hear a multi-tone melody.  
Turn the smoke detector on the bottom plate.  
Test the alarm: press **5 sec** test button.  
The pulsating test alarm sound stops automatically.
3. **Normal situation:** Red LED flashes 1x per 4-5 minutes.
4. **Signals:**  
**3 x beep** every 40 seconds: detector is contaminated  
>> clean the smoke alarm  
  
**1 x beep** every 40 seconds: battery voltage drops  
>> the batteries need to be replaced
5. **IMPORTANT:** Regular maintenance!!

Maintenance =

1 x vacuuming every month at the openings of the smoke detector +  
1 x per month for about **5 sec.** pressing the test button  
[Not necessary to retrieve the detector from the ceiling]

6. **Important:** Please read supplied instructions for additional information.
